The FortiGate-60B and FortiWiFi-60B UTM platform offer Small and Medium Business and SOHO/ROBO users enterprise-class protection against network level and content level threats targeting wireless and wired network infrastructure. These new solutions support a wide array of third generation wireless broadband PC Cards and offer optional built-in 802.11 a/b/g wireless support. The FortiGate-60B platform offers a PC Card slot for wireless broadband connectivity, dual WAN link support for redundant internet connections, a DMZ port and 6 built-in switch ports. The FortiGate-60B platform also offers an integrated analog modem for dial-up failover capability.
